Profile

Aspiring Data Analyst pursuing a Master's in Mathematical Modeling, Simulation, and Optimization. Experienced in data cleaning, exploratory analysis, KPI development, and performance reporting. Skilled in SQL and Python for data preparation and analysis, and proficient in Power BI for creating clear, insightful dashboards. Currently developing skills in SAP Analytics Cloud(SAC) for enterprise analytics and reporting. Looking to collaborate on innovative data analytics initiatives focus on scalable models and actionable insights.

Skills

Technical Skills: Python, SQL

Technologies: Machine Learning, SAP Analytics Cloud(SAC), Power BI(Visualization, Reporting, DAX, Power Query), Microsoft Office (Excel, PowerPoint, SharePoint)

Languages: English(B2), German (B1)

Experience

Freelance Consultant

July 2021 – Aug 2022

- Assisted in preparing and cleaning datasets using Python and SQL to ensure accuracy and consistency.
- Focused on improving data readiness and structure to assist analytics and modeling tasks.

Academic Seminar – Age Structure Susceptible-Infected-Recovered(SIR) Model

github.com/name/repo

- Developed an age-structured SIR simulation model supported by an engineered data pipeline to acquire and process web-sourced public health data for parameterization.
- Modeled and stored cleansed data into optimized structures, enabling efficient querying and integration with the simulation and analytical processes.

Projects

Healthcare Data Analytics Dashboard

- Built an interactive Power BI dashboard integrating SQL and Excel healthcare data to track patient and hospital metrics.
- Used Power Query and DAX for automated data refresh and real-time KPIs performance insights.

Sales Performance Dashboard

- Built an interactive SAP Analytics Cloud (SAC) story using imported datasets for sales performance analysis.
- Applied basic data modeling concepts, measures, dimensions, and KPI visualizations.

Education

University of Koblenz, MSc in Mathematical Modeling Simulation and Optimization

October 2022 – Present

- **Coursework:** Machine Learning, Partial Differential Equations, Big Data, Linear and Non-linear Optimization

Certifications

Apache Spark Programming with Databricks (May 2023)

Skills Acquired: Apache Spark, Databricks

Data Analysis by Microsoft and LinkedIn (Feb 2025)

Skills Acquired: Data Analysis, ETL, Excel, SQL

Power BI for Data Analysts by Microsoft Press (Feb 2025)

Skills Acquired: Power BI, DAX, Reporting
