ABOUT ME

A results-driven and passionate **Data** and **Cloud** enthusiast with practical experience in data preparation and analytics workflows. I specialize in cleaning and analyzing data using Python and SQL and currently developing skills in SAP Analytics Cloud (SAC) to build KPI-driven dashboards and reports. I am a Team player and adaptive to new technologies which is evident from my work experience across various domains of analysis and cloud. Currently pursuing my master's in mathematical Modeling Simulation & Optimization from Universität Koblenz.

WORK EXPERIENCE

ACADEMIC SEMINAR AGE STRUCTURE SUSCEPTIBLE-INFECTED-RECOVERED (SIR) MODEL – 10/2023 – 03/2024 – KOBLENZ, GERMANY

Link: <https://github.com/SasiVardhanReddy3/Panda>

- Developed an age-structured SIR simulation model supported by an engineered data pipeline to acquire and process web-sourced public health data for parameterization.
- Modeled and stored cleansed data into optimized structures, enabling efficient querying and integration with the simulation and analytical processes.

FREELANCING CONSULTANT – 07/2021 – 08/2022

- Assisted in preparing and cleaning datasets using Python and SQL to ensure accuracy and consistency.
- Focused on improving data readiness and structure to assist analytics and modeling tasks.

SKILLS

Programming Databases: Python, MySQL, RDBMS, VBA

Analytics & BI Tools: Power, Tableau, SAP Analytics Cloud (SAC)

Office 365: Microsoft Excel, PowerPoint, Outlook, SharePoint, Word

Version Control: Git, GitHub (Developing)

Cloud & Other Tools: AWS, Docker, ETL

EDUCATION AND TRAINING

10/2021 – CURRENT Koblenz, Germany

MASTERS IN MATHEMATICAL MODELING SIMULATION & OPTIMIZATION: Universität Koblenz

07/2017 – 05/2021 Rajampet, India

BACHELORS IN MECHANICAL ENGINEERING: AITS

LANGUAGE SKILLS

Mother tongue(s): TELUGU

Other language(s): ENGLISH: C1, GERMAN: B1, HINDI: B1

● PROJECTS

11/2025 – 11/2025
Sales Performance Dashboard

- Worked on SAP Analytics Cloud (SAC) interactive story using imported datasets for sales performance analysis.
- Applied basic data modeling concepts, measures, dimensions, and KPI visualizations.

06/2025 – 06/2025
Healthcare Data Analytics Dashboard

- Built an interactive Power BI dashboard integrating SQL and Excel healthcare data to track patient and hospital metrics.
- Used Power Query and DAX for automated data refresh and real-time KPIs performance insights.

Foundational AI–Enhanced AWS Data Pipeline

- Developed an AWS-based data pipeline that ingests raw CSV files into Amazon S3 and leverages AWS Glue to clean and transform the data.
- incorporated AWS Bedrock to produce automated data summaries using foundation models and utilized AWS SageMaker to execute Python-driven data quality validations on the processed datasets.

.

● CERTIFICATIONS

05/2023
Apache Spark Programming with Databricks. [Link](#)

Data Bricks

02/2025
Data Analysis by Microsoft and LinkedIn [Link](#)

Microsoft

02/2025
Power BI for Data Analysis [Link](#)
